Attached you will find a copy of Contract Modification No. 3 which authorizes payment for Council meetings and Committee meetings at a set rate. The document also states the support data required before payment can be made.

With the disapproval of payments before January 15, 1986, the committee payments made prior to this date will require Council review. The only recommendation I have at this time is that Council change these payments to the FY 85 Council budget. If you have additional questions, feel free to contact me at your convenience.
